YALE DIVINITY QUARTERLY

Published by
The Students of the School of Religion of Yale University

Vol. XIII MARCH, 1917 No. 4

Entered as second-class matter May 26th, 1904, at the Post Office at New Haven, Conn., under the act of Congress of March 3d, 1879.

Why Choose the Yale School of Religion?

1. It is non-sectarian—the student body last year included Congregationalists, Methodists, Disciples, Baptists and Presbyterians, with a lesser number of Lutherans, Reformed, Episcopalians, United Brethren and Mennonites.

2. It combines thorough, fearless, modern scholarship with spiritual earnestness and missionary zeal.

3. It is an organic part of Yale. It offers (not in some neighboring institution but within itself) all the facilities for graduate study which are found in a great university.

4. It confers upon its graduates a Yale degree, good for its face value in any part of the world.

5. It has the largest Missions Library in America and with its university courses in the languages, literatures and religions of other lands, together with competent instruction in the Science of Missions, offers unusual training for work in the foreign field.

6. The opportunity for a limited number of students to live in Lowell House, Davenport House, or Neighborhood House, social settlements in the crowded section of New Haven, and the intimate relation of the School to the work of the Organized Charities and other forms of philanthropic effort offer special advantages to students having in mind some form of social service.

The Social Teachings of the Prophets and Jesus

By Prof. Charles Foster Kent, Ph.D., Litt D.

377 Pages, 12 mo., Cloth, $1.50

This book answers clearly and directly the vital questions that thoughtful men are asking.

Has Christianity failed to solve the problems of human society or have men failed to appreciate and apply its social principles?

Is it true that in the utter breakdown of the present materialistic civilization the religion of the prophets and Jesus alone remains?

What was their contribution to the solution of such social problems as poverty, the living wage, the program of Socialism, the rights and duties of capital and labor, the responsibilities of public officials, the private ownership of property, the divorce question, the treatment of criminals, the practical interpretation of democracy, the right and wrong of war, and the basis of an enduring peace?

Are their teachings too idealistic to meet modern conditions or are they alone practical?

These vital social problems, in both their ancient and modern aspects, are treated in this book frankly and constructively. Written in a clear, fascinating style, this volume has a compelling message for the business man, for parents, for teachers, for pastors, for social workers, for men in public life, and for all who are striving to become intelligent and efficient citizens in the new social order.
